

SOPHIREAK SOENG

Cyber Security Intern Candidate

Phnom Penh, Cambodia | (885+)68 547 778 | sophireaksoeng@gmail.com | <https://www.linkedin.com/in/sophireak-soeng-10b668265/>

PROFESSIONAL SUMMARY

Motivated Information Technology undergraduate at the Royal University of Phnom Penh (RUPP) with a strong passion for cyber security, networking, and ethical hacking. Hands-on experience with Linux administration, network analysis, and offensive/defensive security tools through coursework, CTF challenges, and personal lab projects. Eager to contribute to Wing Bank's security team while learning from real-world banking-grade security operations.

EDUCATION

Royal University of Phnom Penh (RUPP)

Phnom Penh, Cambodia

Bachelor of Information Technology Engineering

Expected: June 2026

- Relevant coursework: Computer Networks, Operating Systems, Database Systems, Information Security, Web Technology, Programming Fundamentals.
- Self-directed study in penetration testing, network defense, and secure coding practices.

TECHNICAL SKILLS

Networking & Systems: TCP/IP, OSI model, DNS, DHCP, VPN, firewalls, subnetting, Linux (Kali, Ubuntu), Windows administration.

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, John the Ripper, Hydra, Nessus (basic), Splunk (basic SIEM).

Programming & Scripting: Python, Bash, SQL, JavaScript, HTML/CSS; basic automation and security scripting.

Security Concepts: OWASP Top 10, vulnerability assessment, incident response basics, MITRE ATT&CK, social engineering, malware analysis fundamentals.

Other: Git/GitHub, VirtualBox/VMware, Microsoft Office, documentation and reporting.

SECURITY PROJECTS & PRACTICAL EXPERIENCE

TryHackMe / HackTheBox — CTF Practice *(Ongoing)*

- Completed beginner and intermediate rooms covering reconnaissance, web exploitation, privilege escalation, and Active Directory basics.
- Practiced enumeration with Nmap, web app testing with Burp Suite, and post-exploitation in Linux and Windows targets.

Home Penetration Testing Lab *(Personal Project)*

- Built a virtual lab using VirtualBox with Kali Linux, Metasploitable, and Windows VMs to simulate attack and defense scenarios.
- Performed vulnerability scanning, exploitation, and documented findings in professional report format.

Network Traffic Analysis Project *(University Coursework)*

- Captured and analyzed live traffic with Wireshark to identify suspicious patterns, plaintext credentials, and protocol anomalies.
- Presented findings and proposed mitigation strategies (segmentation, encryption, monitoring).

Secure Web Application Mini-Project *(University Coursework)*

- Developed a small web app and tested it against the OWASP Top 10 (SQLi, XSS, broken auth).
- Implemented input validation, parameterized queries, and proper session handling as remediations.

CERTIFICATIONS & CONTINUOUS LEARNING

- Working toward CompTIA Security+ certification.
- Completed Cisco Networking Academy modules (Introduction to Cybersecurity, Networking Essentials).
- Active learner on TryHackMe — pursuing the Pre-Security and Cyber Security 101 paths.
- Studying for CCNA fundamentals to strengthen networking foundation.

SOFT SKILLS

Strong analytical thinking and problem-solving; clear written and verbal communication; team collaboration; quick learner with a growth mindset; reliable, detail-oriented, and committed to ethical conduct.

LANGUAGES

- Khmer — Native
- English — Professional working proficiency
